

QC Report

Project Multi-Status and Logical Filters

Report Code	PE-QAQC-QC-RPT-26010-R01
Session ID	project-multi-logical-filters-emulator-20260730
Date / Time	2026-07-30 10:03:16 +04:00
Agent / Model	Codex / GPT-5
Workspace	C:\wamp64\www\prizm-mobile
Classification	Internal

1. Executive Summary

Outcome: multi-status project chips and Perfex funnel AND/OR filters now return the correct combined results. Backend and mobile release v1.14.3 are deployed.

The UI retained multiple selections, but the request serializer flattened them into a direct value such as `status=3,5`. The Projects controller treated that as one exact value, while funnel grouping and negative operators were lost.

Projects now uses a typed logical filters payload. The API validates an allowlist, applies grouped AND/OR clauses, supports multi-value, negative, comparison, empty and range rules, and keeps legacy comma-separated status requests compatible.

2. Root Cause and Fix

Layer	Before	Corrected
Quick chips	State accumulated correctly	Unchanged
Mobile transport	Array flattened; match type lost	One typed logical group
Projects API	Exact status comparison only	IN lists and grouped Query Builder clauses
Compatibility	Older app effectively used one status	Direct comma lists interpreted as IN

No database schema or business data was modified.

3. Production API Verification

Case	Observed	Result
Status in On Hold + Cancelled	5 rows; statuses 3 and 5	PASS
Status 3/5 AND billing type 3	0 rows; valid empty intersection	PASS
Status 3/5 OR customer 132	6 rows; all satisfied a branch	PASS
NOT IN 1/2 AND deadline range	17 rows; statuses 4 and 5	PASS

Repeated field with OR	5 rows	PASS
Repeated field with AND	0 rows	PASS
Legacy direct status=3,5	5 rows; statuses 3 and 5	PASS

Every API case returned HTTP 200 with zero predicate violations.

4. Android Emulator Verification

Sequence	Expected	Observed	Result
Unfiltered Projects	127	127	PASS
Tap On Hold	On Hold only	4 On Hold	PASS
Add Cancelled	Combined set	5: 4 On Hold + 1 Cancelled	PASS
Remove On Hold	Cancelled only	1 Cancelled	PASS
Status 3/5 AND billing type = 1	Intersection	4	PASS
Same rules with OR	Union	124; includes Finished branch rows	PASS
Status 3/5 AND billing type != 1	Negative intersection	1 On Hold	PASS
Published v1.14.3 APK multi-status	Combined set	5 with both statuses	PASS

5. Automated Quality Gates

Check	Evidence	Result
PHP syntax	PHP 8.2 Projects controller	PASS
Release metadata	v1.14.3; versionCode 29	PASS
TypeScript / Expo alignment	No errors; dependencies current	PASS
Mobile contracts	Logical serialization scenarios	PASS
CRUD audit	303 mutations; 0 skipped	PASS
List audit	107 filterable; 59 sortable; 0 skipped	PASS
Android export	Hermes bundle and 44 assets	PASS
Backend deploy	Run 30515446675	PASS
Android release	Run 30516966680	PASS
APK integrity	91,542,404 bytes; SHA-256 verified	PASS

6. Acceptance and Deployment

Criterion	Result
Second status expands the result set	100% PASS
AND and OR produce distinct correct sets	100% PASS
Negative and repeated-field rules remain intact	100% PASS
Published APK reproduces the passing result	100% PASS
Legacy requests remain compatible	100% PASS

QC AND DEPLOYMENT GATES: PASS. No open Blocker, Major or Minor defects in scope.

7. Traceability

Item	Evidence
Backend commit / PRs	85d8d759; Ghazalawy #280; PrizmIT #1132; merge bb38c8b2
Backend deploy	GitHub Actions 30515446675
Mobile commit	3c232037f81dc59c5eec14ad0ad0e78e588c6560
Mobile release	v1.14.3 / Android versionCode 29 / run 30516966680
Rolling APK	prizm-mobile.apk installed successfully on emulator
Rollback	Revert mobile and backend commits; no schema/data rollback

8. Sign-off

Role	Name	Status	Date
QA automation	Codex	PASS	2026-07-30
Product reviewer	Osama Hassan	Defect reporter	2026-07-30
