

Prizm Energy QC Report 26026

QC Report — Gate Pass Request Native Parity

Report Header

Field	Value
Report Code	PE-QAQC-QC-RPT-26026-R01
Session ID	gatepass-request-native-parity-20260802
Date / Time	2026-08-02 18:44 +04:00
Agent / Model	Codex / GPT-5
Backend workspace	C:/wamp64/www/prizm331-wt-mobile-parity-next
Mobile workspace	C:/wamp64/www/prizm-mobile-app-link-fix
Backend branch	feat/mobile-native-parity-next-DESKTOP-9GO5QC0
Mobile branch	codex/full-native-parity-audit
Turns	Continuous parity task chain
Classification	Internal

1. Executive Summary

Gate Pass Request Manager now has a native, permission-aware mobile workspace that mirrors the canonical Perfex web controller, model, list, request form, detail view, and conversion conditions. The slice includes list/detail/options endpoints, create/update/delete, server search, additive direct filters, sorting, Perfex advanced AND/OR filters, staff and vehicle assignment, and atomic conversion into a Gate Pass.

The mobile UI provides a clearly identified Gate Pass Request workspace, compact relation and validity fields, classification-sensitive sections, searchable single- and multi-select pickers, dense people/vehicle rosters, workflow ownership, conversion state, and native routing for web and API links. Android emulator review caught and corrected list-title clutter, dark-hero contrast, picker safe-area overlap, stacked divider orientation, and picker reset behavior.

The real HTTP runtime suite passed 12/12 scenarios, including additive multi-classification and converted-state filtering plus four-rule Perfex AND and OR funnels. Final TypeScript, mobile contracts, list contracts, CRUD contracts, release metadata, Expo dependency, and web parity gates pass. No Android build, push, backend deployment, or production mutation was performed; the requested single final APK build remains preserved and the overall parity programme remains open.

2. Test Results

Check	Evidence	Result
Canonical MVC review	RequestManager controller, Requests model, list/form/detail views, menu/install	PASS — read before implementation
Backend syntax	Gatepass API, Requests model, runtime test	PASS
API contract	<code>gatepass_requests_api_contract_test.php</code>	PASS — 11/11
Editor options	Authenticated projects, opportunities, staff, vehicles, responsables	PASS — HTTP 200
Runtime create	Gate Pass request with staff and vehicle assignment	PASS — dense detail returned
Server search	PO, location and work-detail text	PASS — exact fixture
Direct multi-filter	Site Visit + Gate Pass classifications	PASS — additive
Four-rule Perfex AND	Classification, relation, duration and marker	PASS — exact request
Four-rule Perfex OR	Independent branches	PASS — request retained through one match
Runtime update	Partial update plus optional vehicle clearing	PASS — atomic
Dense detail	Related identity, requester, representative and validity	PASS
Conversion	Authorized request to Gate Pass #159	PASS — one linked record
Duplicate conversion	Repeat conversion	PASS — rejected; no duplicate
Converted-state + search	Additive direct filters	PASS
Delete and cleanup	Request, assignments and notifications	PASS — zero exact fixtures remain
Runtime total	Real HTTP/API/database suite	PASS — 12/12
TypeScript	<code>npx tsc --noEmit -p tsconfig.json</code>	PASS
Mobile contracts	<code>node scripts/test-mobile-contracts.mjs</code>	PASS
List audit	Explicit parity backend workspace	PASS — 123 server + 2 client searchable; 125 filterable; 78 sortable; 0 skipped
CRUD audit	Advertised mutations versus backend methods	PASS — 360; 0 skipped
Release metadata	<code>npm run verify:release</code>	PASS — v1.17.0/code35
Expo dependencies	<code>npx expo install --check</code>	PASS — current
Web-menu parity	Native static destinations	111/347 covered; 236 missing; 4 dynamic unresolved

3. Android Emulator Verification

State	Verification	Result
List	Module identity, search, funnel, All/Active/Expired chips and GPR display number	PASS
Detail hero	OPERATIONS / GATE PASS REQUESTS , request type, ID and canonical GPR number	PASS
Dense detail	Validity, relation, requester, work authorization, roster and workflow owner	PASS
Create editor	Responsive identity, relation, validity and conditional Gate Pass fields	PASS
Edit picker	Existing staff plus a second staff member, Done · 2 , both retained	PASS
Safe area	Picker header below Android status bar	PASS after correction
Conversion	Confirmation, Gate Pass #159 creation, request update and native linked detail	PASS
Environment restoration	AsyncStorage environment restored to production; app force-stopped	PASS

4. Acceptance Criteria

Severity	Criterion	Result
S1	Request reads and mutations mirror canonical web behavior	100% PASS
S1	Multi-value direct filters remain additive	100% PASS
S1	Four-rule custom Perfex AND/OR funnels work end to end	100% PASS
S1	Conversion is permission-aware, atomic and duplicate-guarded	100% PASS
S1	Runtime fixtures and relations are fully cleaned	100% PASS
S2	Screen clearly identifies its module and record type	100% PASS
S2	Information density and responsive field grouping pass tested emulator states	100% PASS
Release	Avoid another paid Android build before final parity	PASS — no Android build triggered

Scoped quality gate: PASS. Deployment gate: HELD by programme plan. Overall parity programme: OPEN.

5. Code Changes

Backend candidate

- modules/api/config/routes.php
- modules/api/controllers/Gatepass_api.php
- modules/gatepass/models/Requests_model.php
- modules/api/tests/gatepass_requests_api_contract_test.php
- modules/api/tests/gatepass_requests_runtime_test.php
- Commit cb9aa2a50 — feat(api): add native gate pass request parity

Mobile candidate

- components/crud/GatepassRequestEditor.tsx
- components/crud/GatepassRequestSummary.tsx
- components/crud/CrudFormScreen.tsx
- components/crud/CrudDetailScreen.tsx
- lib/module-registry.ts
- lib/native-routing.ts
- scripts/test-mobile-contracts.mjs
- Commit 8e0d995 — feat: add native gate pass request workspace
- Commit c5c9e5d — fix: align gate pass boolean funnel types

The frontend-polish skill materially influenced the compact hierarchy, responsive grouping, safe-area review, and emulator-led visual corrections. The documents skill was used only to follow the mandatory Markdown/PDF report workflow; this report is not a DOCX deliverable.

6. Deployment Status

Target	Status
Gate Pass backend parity	LOCAL CHECKPOINT — not pushed or deployed
Mobile parity branch	LOCAL CHECKPOINT — not pushed
Android APK	NOT BUILT — single final build preserved
Production	UNCHANGED by this slice
Release metadata	v1.17.0 / versionCode 35 unchanged

7. Evidence and Residual Risk

- Emulator evidence: prizm-gatepass-list.png , prizm-gatepass-detail.png , prizm-gatepass-detail-bottom.png , prizm-gatepass-editor.png , prizm-gatepass-edit-multi-done.png , and prizm-gatepass-converted.png under C:/Users/osama/AppData/Local/Temp/ .
- The temporary local PHP server on port 8092 was stopped. Exact CODEX-GPR-* request, Gate Pass, assignment, relation and notification fixtures were removed and verified absent.
- An initial aggregate audit used its stale default backend path and reported a Gate Pass endpoint mismatch. Rerunning with PRIZM_BACKEND_WORKSPACE=C:/wamp64/www/prizm331-wt-mobile-parity-next exposed one real

BooleanRule/CheckboxRule metadata mismatch; it was corrected to scalar SelectRule semantics and the full audit then passed.

- Static parity remains 111/347; 236 static destinations plus 4 dynamic expressions remain for future native work.
- User-owned artifacts/ remains untouched.

8. Sign-Off

Role	Status
Engineering / Codex	Scoped implementation and verification complete
QA/QC	PASS for Gate Pass Request candidate
Product owner	Overall parity acceptance remains open
