

Prizm QC Report 26018

QC Report — Native Tender Triage and Web-Parity Audit

Report Header

Field	Value
Report Code	PE-QAQC-QC-RPT-26018-R01
Session ID	tender-triage-native-parity-20260802
Date / Time	2026-08-02 10:13 +04:00
Agent / Model	Codex / GPT-5
Backend workspace	C:\wamp64\www\prizm331-wt-mobile-parity-next
Mobile workspace	C:\wamp64\www\prizm-mobile-app-link-fix
Backend branch	feat/mobile-native-parity-next-DESKTOP-9G05QC0
Mobile branch	codex/full-native-parity-audit
Classification	Internal

1. Executive Summary

This scoped batch adds a true native, admin-only Tender Triage workflow. The mobile screen provides compact KPI and bucket navigation, search, country quick filters, Perfex funnel filters, record details, Watch/Pursue/Dismiss/Reopen/Converted decisions, undo, multi-selection, bulk dismiss, and reversible authority or branch mute controls.

The API mirrors the web controller's canonical schema, status transitions, dismissal reasons, activity logging, permissions, and no-trace behavior. A runtime defect found during combined-filter testing was corrected: once a custom funnel is active, its AND/OR expression is authoritative and the hidden High/Medium default can no longer erase valid Low-rating or OR-branch results.

A new static web-menu audit establishes the honest programme baseline: 93 of 347 unique static web destinations resolve to existing native screens; 254 remain missing and 4 dynamic destinations require manual resolution. This batch is locally complete, but the broader parity goal is open and deployment is intentionally held for the user's requested single final Android build.

2. Test Results

Check	Evidence	Result
TypeScript	<code>npx tsc --noEmit -p tsconfig.json</code>	PASS
Mobile contracts	<code>npm run test:contracts</code>	PASS
Release metadata safety	<code>npm run verify:release</code>	PASS — unchanged v1.17.0/code35
Web-menu parity audit	<code>npm run audit:web-parity</code>	PASS — 93/347 covered; 254 missing; 4 dynamic
Backend syntax	PHP 8.2 lint on controller and routes	PASS
Backend contracts	Daleela MCP/API contract suite	PASS — 95/95
Diff hygiene	<code>git diff --check</code> in both worktrees	PASS
Admin access	Local authenticated overview probe	HTTP 200
No-trace permission	Local authenticated non-admin overview probe	HTTP 404
Search	Substation returned only the matching record	PASS
Country filter	UAE returned only the DEWA fixture	PASS
Default inbox	High/Medium default returned 2 expected rows	PASS
Low-rating funnel override	Low rule returned the single Low fixture	PASS
Multi-rating	High + Low returned both expected rows	PASS
Logical OR	Low OR source=DEWA returned both exact branches	PASS
Logical AND	sector=Power & Water AND rating=High returned one exact row	PASS
Cross-field OR	title contains Substation OR sector=Oil & Gas returned two exact rows	PASS
Search + filter	Valve Maintenance with include-low returned one exact row	PASS
Decision and undo	Pending → Watch → Undo restored Pending	PASS
Multi-select	Two inbox rows selected and bulk sheet showed	PASS; mutation canceled

Check	Evidence	Result
Emulator density	Dismiss 2 items KPI strip, search, buckets, country chips, and cards visible without overlap	PASS

3. Acceptance Criteria

Severity	Criterion	Result
S1	Funnel AND/OR rules and multi-select values return the exact union/intersection	100% PASS
S1	Admin decisions enforce canonical state transitions and optimistic concurrency	100% PASS
S1	Non-admin users see no Tender Triage affordance and direct API access returns 404	100% PASS
S2	Search, country, bucket, sort, and advanced filters combine without hidden predicates	100% PASS
S2	Undo restores the prior item even after the row leaves the active bucket	100% PASS
S2	Screen is dense, readable, and identifies the module and record	100% PASS
Programme	Every static web destination has a native equivalent	OPEN — 93/347 (26.8%) currently covered

Scoped quality gate: PASS. Deployment gate: HELD. Overall native-web parity programme: OPEN.

4. Code, Git, and Deployment

Item	Evidence
Mobile implementation	233d78d0dee882ac2edcfc00c89b5c31227e6171
Backend implementation	d797b637f
Mobile files	Triage route/screen/query, native routing, shared list header action, contracts, parity audit

Item	Evidence
Backend files	Tender Triage REST controller, routes, contract tests
Release metadata	Deliberately unchanged until the consolidated final release
Push / PR / deploy	Not performed
Production data	Not touched
Local QA fixtures	Six uniquely tagged tender/triage fixtures removed after testing
Rollback	Revert the two local feature commits before any future merge

5. Emulator Evidence and Notes

- Emulator: emulator-5554, AVD prizm-test.
- Dense list evidence: C:\Users\osama\AppData\Local\Temp\triage3.png (earlier header) plus the final hot-reloaded hierarchy showing a one-row KPI strip.
- Detail evidence: C:\Users\osama\AppData\Local\Temp\detail.png.
- The emulator froze once at the rendering/input layer; a clean cold reboot restored it and the complete workflow was rerun.
- Temporary local API, token, and admin QA hooks were removed. lib/auth.ts, lib/environment.ts, and lib/impersonation.ts match the branch baseline.
- The user-owned untracked artifacts/ directory was preserved.
- The previously shipped Payment Request App Link, JWT/CSRF separation, biometric contracts, task-card layout, and report-image resolver were not regressed by this slice.

6. Sign-off

Role	Name	Status	Date
QA automation	Codex	Scoped PASS; deployment held; parity debt quantified	2026-08-02
Product reviewer	Osama Hassan	Final acceptance pending consolidated release	Pending
