

QC Report — Android ERP App Links

Report Header

Field	Value
Report Code	PE-QAQC-QC-RPT-26011-R02
Session ID	android-erp-app-links-production-20260730
Date / Time	2026-07-30 23:08:16 +04:00
Agent / Model	Codex / GPT-5
Workspace	C:\wamp64\www\prizm-mobile
Mobile branch	codex/erp-app-links
Classification	Internal

1. Executive Summary

Android release v1.14.4 declares verified App Links for `https://ms.prizm-energy.com/MS` and `/MS/admin/*`. Incoming ERP URLs pass through the existing native route resolver: recognized record URLs open their native mobile screen, while unmatched ERP pages open the native ERP module hub. Upload/download paths are not claimed.

Production activation is complete. The website association returns HTTP 200 JSON, Android reports the domain as verified, and the published v1.14.4 APK cold-started directly from an unhinted ERP HTTPS URL into the matching native Project screen.

2. Implementation

Layer	Change
Android manifest	Expo intentFilters emits VIEW, DEFAULT, BROWSABLE, and autoVerify=true for the production ERP host and paths.
Cold/warm start routing	app/+native-intent.ts rewrites operating-system URLs through resolveIncomingAppLink().
Native destination	Known ERP records use the existing route map; unknown internal ERP pages use /(tabs)/erp.
Website association	public/.well-known/assetlinks.json contains package com.prizmenenergy.mobile and the stable SHA-256 signing fingerprint.
Safety boundary	/MS/uploads/* and unrelated external URLs are not claimed or rewritten.

3. Android Emulator Verification

Tests ran on emulator-5554 first with the local x86_64 APK and finally with the published 91,543,576-byte v1.14.4 release APK.

Test	Expected	Observed	Result
Manifest inspection	Verified HTTPS filter for ERP paths	Literal /MS, prefix /MS/admin, AutoVerify=true	PASS
Package-targeted Project URL	Native Project 42 detail	Opened P1051 - SEALING OF CABLE ENTRY with full native detail UI	PASS
Unmatched ERP dashboard URL	Native ERP hub	Opened ERP modules list; browser was not opened	PASS
Real verified-domain cold start without package hint	Android selects Prizm CRM	com.prizmenenergy.mobile/.MainActivity, cold launch in 2.3 seconds	PASS
Published APK deep route	Native Project 42 detail	Opened P1051 - SEALING OF CABLE ENTRY after dismissing What's New	PASS
Published APK unmatched dashboard URL	Native ERP hub	Opened ERP modules list; browser was not opened	PASS
Android domain state	Production host verified	ms.prizm-energy.com:verified	PASS

Screenshot evidence: C:\Users\osama\AppData\Local\Temp\prizm-app-links-v1144-final.png.

4. Automated Quality Gates

Check	Result
Release metadata	PASS — v1.14.4, Android versionCode 30
TypeScript	PASS
Expo dependency alignment	PASS — dependencies up to date
Mobile contract tests	PASS — includes App Link manifest, association, cold-start, internal fallback, and external passthrough
CRUD contract audit	PASS — 303 mutations, 0 skipped
List contract audit	PASS — 105 server-searchable + 2 client-searchable, 107 filterable, 59 sortable, 0 skipped
Android native APK build	PASS — x86_64 debug APK, 65,966,484 bytes
Android production export	PASS — Hermes bundle, 44 assets
Production association	PASS — HTTP 200 application/json; SHA-256 aa79d81c66a706c774f23be51c768fc04fcdcbfa04be7abc49496a533a38c27ef
GitHub release workflow	PASS — run 30571157067, Android build and Pages deploy
Published APK integrity	PASS — 91,543,576 bytes; SHA-256 6cf0c250e134a877ce4adcd3fdb3220d80ff195fb190a155035fd68835683b2
Published APK signature	PASS — certificate SHA-256 fac61745dc0903786fb9ede62a962b399f7348f0bb6f899b8332667591033b9c

Check	Result
Git whitespace check	PASS

Acceptance Criteria

Severity	Criterion	Result
S1	A supported ERP HTTPS link is handled by the installed app	100% PASS in production
S1	The link resolves to the matching native record	100% PASS in production
S1	Unknown ERP pages remain inside the app	100% PASS in production
S2	External and upload URLs are not captured by this feature	100% PASS by contract/manifest inspection
S1	Production domain verification	100% PASS — Android reports verified
S1	Published v1.14.4 APK verification	100% PASS — installed and exercised

QC and production deployment gates: PASS. No open Blocker, Major, or Minor defects in scope.

5. Code, Git, and Deployment

Item	Evidence
Mobile implementation commit	9a716ca
Mobile branch	codex/erp-app-links
Released version	v1.14.4 / Android versionCode 30
Production asset association	/var/www/html/.well-known/assetlinks.json; HTTP 200 and Android verified
Mobile deployment	origin/main at dc0aed0; workflow 30571157067 succeeded
Rolling APK	latest/prizm-mobile.apk; published, downloaded, signature-checked, installed, and exercised
Rollback	Revert commit 9a716ca; remove the website association file if deployed

6. Remaining Product-Parity Scope

The automated checkpoint covers 131 registered resources, 43 workflow-action modules, 107 searchable/filterable lists, 59 sortable lists, and 303 advertised mutations with zero skipped contract checks.

Six backend contract repairs remain before full web/mobile parity can be claimed: Task Templates/Task Manage, Product Families, Client Items composition review, Cost Center child endpoints, Survey Results, and Knowledge article CRUD. Separately, several lower-priority web-only workflows remain deliberately deferred by product decision.

7. Sign-off

Role	Name	Status	Date
QA automation	Codex	Implementation, contracts, release workflow, published APK, and production App Link gates PASS	2026-07-30
Product reviewer	Osama Hassan	Requested ERP links open the installed app	2026-07-30

Generated under Prizm QA/QC Policy. Classification: Internal.
