

Native Parity v1.18 Production Release

QC Report — Native Parity v1.18 Production Release

Report Header

Field	Value
Report Code	PE-QAQC-QC-RPT-26027-R01
Session ID	native-parity-v1.18-production-20260802
Date / Time	2026-08-02 20:28 +04:00
Agent / Model	Codex / GPT-5
Backend workspace	C:/wamp64/www/prizm331-wt-mobile-parity-next
Mobile workspace	C:/wamp64/www/prizm-mobile-release-ci-hotfix
Backend release	PrizmiT/prizm331 main at 45895ef7fc8906fc854b56a725d98e884d3bdc75
Mobile release	Ghazalawy/prizm-mobile main at ecd0892acadc8ea171b52626d5e5becf1c609e52
Turns	Continuous native-parity and deployment task chain
Classification	Internal

1. Executive Summary

The consolidated native administration and purchasing checkpoint is deployed. The backend candidate was merged through the required fork/upstream chain and the production deployment workflow passed. Android v1.18.0, versionCode 36, was built locally from the exact synchronized mobile `main`, signed with the certificate associated with production `assetlinks.json`, installed on `emulator-5554`, and smoke-tested with the exact Payment Request 1211 HTTPS App Link before publication.

The rolling APK release now contains the native parity work for Setup administration, Roles, Departments and activity, Custom Fields, Email Templates, Supplier Invoices, Gate Pass Request Manager, Payment Request detail recovery, universal `/MS` App Links, additive multi-value filters, and Perfex advanced logical filters. Release publication used the local guarded path and did not trigger a new GitHub-hosted Android build.

Scoped release quality is PASS. The wider native-parity programme remains OPEN: the static audit reports 111 of 347 web destinations mapped to native screens, with 236 static destinations missing and four dynamic expressions unresolved.

2. Deployment Results

Target	Evidence	Result
Backend fork PR	Ghazalawy/prizm331 #321	PASS — merged
Backend upstream PR	PrizmIT/prizm331 #1200	PASS — merged as 45895ef7fc8906fc854b56a725d98e884d3bdc75
Backend CI	GitHub run 30754815885, PHP 8.3	PASS
Production deployment	Deploy On Demand run 30754870469	PASS
Mobile parity PR	Ghazalawy/prizm-mobile #7	PASS — merged as e98e61625b60ef4d17cc7a13c7f45099170442ca
Local release hardening	Mobile PRs #8 and #9	PASS — merged
Mobile release source	main at ecd0892acadc8ea171b52626d5e5becf1c609e52	PASS — exact origin/main
Android release	v1.18.0 / versionCode 36	PASS — locally built and published
Rolling release	latest , asset prizm-mobile.apk	PASS — updated 2026-08-02 16:25:20Z
Hosted Android build	Latest workflow remained run 30732511640 at older c06f94d	PASS — no new hosted run

3. Test Results

Check	Evidence	Result
Backend PHP syntax	All changed PHP sources	PASS
Broad backend contract	Daleela aggregate	PASS — 96/96
Email Templates contract	Dedicated suite	PASS — 7/7
Supplier Invoice contract	Dedicated suite	PASS — 11/11
Supplier Invoice runtime	Real HTTP/API/database suite	PASS — 12/12, fixtures cleaned
Gate Pass contract	Dedicated suite	PASS
Gate Pass runtime	Real HTTP/API/database suite	PASS — 12/12, fixtures cleaned
App Link backend contract	Dedicated suite	PASS — 11/11
Release metadata	npm run verify:release	PASS — v1.18.0/code36
Expo dependencies	npx expo install --check	PASS
TypeScript	npx tsc --noEmit -p tsconfig.json	PASS
Mobile contracts	npm run test:contracts	PASS
List contract audit	Server search/filter/sort contracts	PASS — 123 server + 2 client searchable, 125 filterable, 78 sortable, 0 skipped
CRUD contract audit	Advertised mutations versus backend methods	PASS — 360, 0 skipped

Check	Evidence	Result
Web-menu parity audit	Existing native routes	111/347; 236 missing; 4 dynamic unresolved
Production association	<code>/.well-known/assetlinks.json</code>	PASS — HTTP 200
Payment Request web handoff	Exact record 1211 URL	PASS — HTTP 307 handoff and emulator App Link smoke test

4. Android Artifact Verification

Property	Verified value	Result
File	<code>prizm-mobile.apk</code>	PASS
Size	91,697,024 bytes	PASS
SHA-256	BA162C57CB5E951F3DC55BFE267687E47A40C477A3C8A663F40A86B98A8E1794	PASS — local and release digest match
Signing SHA-256	FA:C6:17:45:DC:09:03:78:6F:B9:ED:E6:2A:96:2B:39:9F:73:48:F0:BB:6F:89:9B:83:32:66:75:91:03:3B:9C	PASS — matches production association
Installed package	<code>com.prizmenenergy.mobile</code>	PASS
Installed version	versionName 1.18.0; versionCode 36	PASS
Intent registration	HTTPS/HTTP, <code>ms.prizm-energy.com</code> , prefix <code>/MS</code> , autoVerify	PASS
Exact smoke URL	<code>/MS/przpurchase/Payment_Request/view_payment_request/1211</code>	PASS — handled by Prizm MainActivity

5. Acceptance Criteria

Severity	Criterion	Result
S1	Backend release is merged, tested, and deployed through the approved chain	100% PASS
S1	Published APK is built from synchronized <code>main</code> and cryptographically verified	100% PASS
S1	Exact Payment Request App Link resolves into the installed app	100% PASS
S1	Additive direct filters and multi-rule Perflex AND/OR contracts remain intact	100% PASS
S1	Runtime mutation fixtures are fully cleaned	100% PASS

Severity	Criterion	Result
S2	Release metadata and installed package version agree	100% PASS
S2	Local release avoids a new hosted Android workflow	100% PASS
Programme	Every Perfex web destination has a native screen	OPEN — 111/347 static destinations covered

Scoped release gate: PASS. Production deployment gate: PASS. Overall native-parity programme: OPEN.

6. Code and Release Provenance

Backend

- Parity commits include Supplier Invoice `f7b847e4e`, Gate Pass Request `cb9aa2a50`, and consolidated merge `1ef3bc075`.
- Fork PR: `Ghazalawy/prizm331#321`.
- Upstream PR: `PrizmIT/prizm331#1200`.
- Production merge: `45895ef7fc8906fc854b56a725d98e884d3bdc75`.

Mobile

- Release metadata commit: `3d3cfe8`.
- Parity merge PR: `Ghazalawy/prizm-mobile#7`, merge `e98e61625b60ef4d17cc7a13c7f45099170442ca`.
- Keytool warning hardening: PR #8, merge `5bc45912418712be52fa63fd5cdccfb5467a131a`.
- Windows Android SDK discovery: PR #9, merge `ecd0892acadc8ea171b52626d5e5becf1c609e52`.
- Public APK: `https://github.com/Ghazalawy/prizm-mobile/releases/download/latest/prizm-mobile.apk`.

The documents skill was used to follow the required Markdown/HTML/PDF QC workflow. The local release path materially reduced deployment cost by preventing an additional hosted Android workflow and preserving Gradle build artifacts for subsequent releases.

7. Residual Risk and Follow-up

- Static native coverage remains 111/347. The remaining 236 static destinations and four dynamic expressions are documented by `npm run audit:web-parity`; they are not represented as complete.
- Fingerprint sign-in and CSRF/JWT separation were covered by the earlier v1.15.2 production and contract report; the v1.18.0 regression suite passed, but this release session did not add a physical-device biometric enrollment exercise.
- The first clean local build took approximately 26 minutes because Expo regenerated Android and compiled native C++/Hermes ABIs. The Gradle cache now exists locally, while GitHub-hosted build minutes remained unused.
- The generated APK is signed by the established certificate already declared in production `assetlinks.json`. Rotation would require coordinated APK and website association updates.
- User-owned `artifacts/` in the feature worktree was not modified.

8. Sign-Off

Role	Status
Engineering / Codex	PASS — implementation, merge, build, emulator smoke test, and publication complete
QA/QC	PASS — scoped production release
Deployment	PASS — backend and Android release live
Product owner	Overall parity acceptance remains open
