

Prizm QC Report 26020

QC Report — Native Departments and Authenticated Activity Hardening

Report Header

Field	Value
Report Code	PE-QAQC-QC-RPT-26020-R01
Session ID	departments-activity-native-parity-20260802
Date / Time	2026-08-02 12:55 +04:00
Agent / Model	Codex / GPT-5
Backend workspace	C:\wamp64\www\prizm331-wt-mobile-parity-next
Mobile workspace	C:\wamp64\www\prizm-mobile-app-link-fix
Backend branch	feat/mobile-native-parity-next-DESKTOP-9G05QC0
Mobile branch	codex/full-native-parity-audit
Turns	Continuous parity task chain
Classification	Internal

1. Executive Summary

This scoped batch adds the full administrator-only Departments workflow natively after reading Perfex's canonical Departments controller, model, and view. The native module now provides list, search, sorting, Perfex advanced filters, dense detail, create, edit, guarded delete, mailbox-folder discovery, and IMAP connection testing. It preserves web checkbox semantics and allows an administrator to replace an IMAP password on edit while a blank value retains the encrypted secret.

The API exposes only an explicit safe read schema. Department passwords are never returned to the app. Existing encrypted credentials are decrypted only in server memory for folder/test actions, and connection errors redact the submitted secret. Writes delegate to Departments_model, enforce unique non-empty email addresses and the canonical TLS/SSL enumeration, and retain the web model's referenced-ticket deletion guard.

Emulator testing also found an app-wide generic deletion-navigation defect: a successful delete could leave the user on the deleted record because history-back returned to an earlier detail/edit entry. Delete success now immediately replaces the route with the owning list, refreshes the collection asynchronously, and surfaces mutation failures.

This report additionally records the preceding authenticated Activity hardening: Dashboard/My Activity reads now use GET /api/my/activity, derive the effective authenticated staff identity, support View-As, cap results, and no longer use the forbidden generic entity endpoint.

The scoped quality gate passes. Deployment remains held for the user's requested single consolidated Android release. Static web-menu parity is now 106/347, leaving 241 static destinations and 4 dynamic destinations open.

2. Test Results

Check	Evidence	Result
TypeScript	<code>npx tsc --noEmit -p tsconfig.json</code>	PASS
Mobile contracts	<code>npm run test:contracts</code> against current backend worktree	PASS
Release metadata safety	<code>npm run verify:release</code>	PASS — unchanged v1.17.0/code35
Web-menu parity audit	<code>npm run audit:web-parity</code>	PASS — 106/347 covered; 241 missing; 4 dynamic
Backend syntax	PHP 8.2 lint, <code>Setup_api.php</code>	PASS
Setup backend contract	<code>setup_api_contract_test.php</code>	PASS
Activity backend contract	<code>my_activity_api_contract_test.php</code>	PASS
Diff hygiene	<code>git diff --check</code> in both worktrees	PASS
Department list	Authenticated admin list, 11 production-like local rows	HTTP 200
Department App Link	/MS/admin/departments into native module	PASS
Department folder validation	Unsaved form with missing IMAP configuration	HTTP 422; inline safe message
Department connection validation	Unsaved form with missing IMAP configuration	HTTP 422; inline safe message
Department create	Numeric fixture 260804	HTTP 201
Department detail	Created record ID 16	HTTP 200
Department update	Rename to 260805, enable Hide from customers	HTTP 200; persisted
Department delete	Fixture IDs 16, 17, and 18 across navigation retests	HTTP 200; all removed

Check	Evidence	Result
Delete navigation regression	Route immediately replaced by Departments list	PASS
Post-delete refresh	List returned from 12 to 11 and fixture disappeared	PASS
Secret visibility	List/detail safe-field schema and emulator UI	PASS — no password returned
Editable retained secret	Edit form shows empty secure replacement input	PASS
Activity dashboard query	GET /api/my/activity?limit=10&offset=0	HTTP 200
Activity full page query	GET /api/my/activity?limit=200&offset=0	HTTP 200
Generic activity access	Mobile source and post-fix Apache traffic	PASS — no core_crm_api/entity use

3. Acceptance Criteria

Severity	Criterion	Result
S1	Saved IMAP passwords never leave the backend	100% PASS
S1	Existing saved secret can be reused server-side for native IMAP actions	100% PASS
S1	Department writes mirror canonical Perfex model semantics	100% PASS
S1	Department CRUD is reversible and leaves no QA fixtures	100% PASS
S1	Activity data is scoped to the authenticated/effective staff identity	100% PASS
S2	Web Departments URL resolves to a dense native screen	100% PASS
S2	Folder/test actions provide inline, actionable feedback	100% PASS
S2	Generic deletion returns to the correct owning list	100% PASS
Programme	Every static web destination has a native equivalent	OPEN — 106/347 (30.5%) covered

Scoped quality gate: PASS. Deployment gate: HELD. Overall native-web parity programme: OPEN.

4. Code, Git, and Deployment

Item	Evidence
Mobile Departments implementation	b2827b7
Backend Departments implementation	8ef3ab497
Mobile Activity hardening	acd1f2f
Backend Activity hardening	aa6485e55
Release metadata	Deliberately unchanged until the consolidated final release
Push / PR / deploy	Not performed
Production data	Not touched
Local QA fixtures	Department IDs 16, 17, 18 removed; list restored to 11
User files	Untracked artifacts/ preserved
Rollback	Revert the scoped mobile/backend commits before any future merge

5. Emulator Evidence and Notes

- Emulator: emulator-5554, Android development build.
- Dense list screenshot: artifacts/departments-list.png.
- Dense mailbox tools screenshot: artifacts/department-tools.png.
- IMAP validation hierarchy: artifacts/tools-error.xml.
- CRUD hierarchies: artifacts/dept-created.xml, artifacts/dept-edited.xml, artifacts/delete-refreshed.xml.
- Authenticated Apache evidence recorded HTTP 200/201/422 for the expected Department paths and HTTP 200 for My Activity.
- The temporary WAMP worktree URL override was removed before commit; lib/environment.ts matches the branch baseline.
- Real outbound IMAP authentication was intentionally not attempted without a dedicated QA mailbox; canonical service wiring, missing-config behavior, saved-secret handling, and error redaction are covered.

6. Sign-off

Role	Name	Status	Date
QA automation	Codex	Scoped PASS; deployment held; parity programme open	2026-08-02
Product reviewer	Osama Hassan	Final acceptance pending	Pending

Role	Name	Status	Date
		consolidated release
